(1)

結果圖:

```
In [27]: runfile('C:/Users/USER/OneDrive/桌面/Vpython work/untitled0.py', wdir='C:/Users/USER/OneDrive/桌面/Vpython work')
請輸入成績:

61
及格
In [28]: runfile('C:/Users/USER/OneDrive/桌面/Vpython work/untitled0.py', wdir='C:/Users/USER/OneDrive/桌面/Vpython work')
請輸入成績:

60
剛好及格
In [29]: runfile('C:/Users/USER/OneDrive/桌面/Vpython work/untitled0.py', wdir='C:/Users/USER/OneDrive/桌面/Vpython work')
請輸入成績:

59
不及格
In [30]:
```

程式碼:

```
1 print("請輸入成績:")
2 score = int(input())
3 if score >60:
4    print("及格")
5 elif score==60:
6    print("剛好及格")
7 else:
8    print("不及格")
```

結果圖:

程式碼:

```
import random
    min_num = 0
    max_num = 99
    ans num = random.randrange(0,99)
    while True:
        num = int(input())
        if num > ans num:
            if num < max_num:</pre>
 8
 9
                max num = num
            print ("在",min_num,"和",max_num,"之間")
10
        elif num < ans num:</pre>
11
12
            if num > min num:
                min num = num
13
            print ("在",min_num,"和",max_num,"之間")
14
15
        else:
            print("Bingo答對了")
